

# The health of your family depends on it.

## Reproductive Risk

Learn your risk for having a child with a genetic disease

### → WHY

Results are actionable and can be used to plan ahead for the health of your future children.

### → WHAT

jscreen® offers access to comprehensive reproductive carrier screening. This test includes Tay-Sachs, cystic fibrosis and more than 260 other genetic conditions.

### → WHO

Designed for individuals between the ages of 18-45.

jscreen® is a national genetic screening and education program offering access to comprehensive, at-home testing and genetic counseling.

Learn more about our testing options and find out what is right for you.

## Cancer Risk

Learn your risk for more than 11 different types of cancer

### → WHY

Results are actionable and can be used for cancer prevention, early detection and treatment.

### → WHAT

jscreen® offers access to comprehensive hereditary cancer testing. This test includes *BRCA1* and *BRCA2* and more than 60 other cancer predisposition genes.

### → WHO

Designed for individuals 21 years of age and older.
